Paulownia kitchen cabinets

All Paulownia used in our cabinets is supplied from full chain of custody sustainable plantations.

- **Paulownia** is a real sustainable eco-friendly light weight timber.
- **The Paulownia tree** regrows multiple times when cut to produce timber.
- **The Paulownia tree** captures up to 10x the amount of CO₂ to any other tree.
- **The Paulownia tree** produces up to 4x the amount of oxygen to any other tree.
- **Finished Paulownia** has a similar appearance to oak.
- **Paulownia** is water resistant & exceptionally stable.
- **Paulownia** is pest, termite and insect resistant.
- **Paulownia** with a high ignition temperature is ideal for kitchen cabinets..

Cabinets made from Paulownia will store all the CO₂ captured hereby helping the environment

Paulownia Kitchen Cabinets can be supplied in natural unfinished Paulownia, or can be finished to order in clear lacquer, wood stains, coloured stains, primed or painted.

Solid wood kitchen doors

Full range of YPF solid wood kitchen doors

YPF manufacturers solid wood pine, knotless pine, paulownia, tulip wood, oak & walnut doors to standard cabinet sizes. All door designs can be made to bespoke sizes and can be supplied unpainted or can be supplied painted to any finish specified.

[CLICK HERE TO VIEW DOOR INFORMATION](#)

Finishing service

Finishing service & paint colours stocked (paint not doors)

All our kitchen cabinets are supplied in natural unpainted Paulownia, additional preparation might be required prior to painting.

After receiving delivery it is the customers responsibility to store the cabinets properly and finish them immediately to avoid splitting, bowing or movement. Failure to handle, store or finish the cabinets will invalidate the warranty on our cabinets.

We offer a bespoke paint finish matched to any RAL or Farrow & Ball colour, primer is matched to the colour of the top coat specified. For a natural look we recommend either a clear lacquer or stain finish.

When a clear lacquer, stain or wax is applied, shade/grain differences may remain visible between the sections of the wood. Colours and shades might vary from the colour charts or online images used. Different batches of paint or stains might have a different colour shades and therefore might not match previously painted or stained cabinets. Doors and drawer fronts might have a different colour shade to the cabinets painted, lacquered or stained in the same colour.

Wood is a hygroscopic material, items when finished might require remedial work once they have climatized to their new environment, any site visits to carry out remedial work to finishing, return or redelivery costs will have to be paid for by the customer.

[Click here to view an online stain colour chart](#)

Ral colour chart

Sustainability & the environment

- The Paulownia tree has beautiful large leaves and beautiful flowers (up to 6 cm in diameter) and a beautiful crown.
- It has up to 10 times the capacity of a regular tree to capture carbon dioxide(CO₂).
- One Paulownia tree captures 98kg of CO₂ , 1 acre of 450 trees captures 44 metric tonnes of CO₂ per year.
- It grows and matures extremely fast (7 to 8 years) and can be felled multiple times before having to be replanted.
- Paulownia timber from sustainable forests is used in a wide range of industries.
- Its high ignition temperature makes it ideally suited to be planted in areas where wildfires are a regular occurrence.
- Its leaves (foliage mass) are often used for fattening of cattle. (cows, sheep, goats, etc.)
- Extracts from the leaves are included in the composition of medicines, creams and perfumes.
- One hectare of Paulownia trees can generate up to 800 kg of honey.
- Its edible flowers are a part of some European restaurants menus.
- Strong resistance to diseases and insect pests makes it ideal for reforestation.
- Agroforestry, the Paulownia tree is suitable to plant amongst other crops such as wheat and corn.
- In the energy sector the Paulownia tree is used for biofuel, biogas bioethanol, pellets, and timber chips.
